

XXVth Moriond Astrophysics Meeting *When UV meets IR: a history of star formation*

La Thuile, Valle d'Aosta
6-12 March 2005

<http://moriond.in2p3.fr/A05/>

Local Organizing Committee

*D. Elbaz (Chair, CEA), H. Aussel (Co-Chair, CEA), P.-A. Duc (CEA),
V. Buat (Marseille), D. Bugarella (Marseille), H. Dole (IAS),
E. Le Floc'h (Arizona), D. Kunth (IAP), T. Montmerle (Grenoble),
L. Tresse (Marseille), J. Tran Thanh Van*

Science Topics

Massive star formation in nearby and distant galaxies
The physics of starbursts
The role of AGN in galaxy formation
The physics of galaxy groups and clusters
From a transparent to a dusty Universe
Cosmic history of star formation

Scientific Organizing Committee

*C. Cesarsky (ESO), F. Combes (Obs. Paris), S. Charlot (IAP/MPE),
V. Charmandaris (Cornell/Crete), M. Dickinson (NOAO), A. Franceschini (Padova),
U. Fritze-v. Alvensleben (Gottigen), B. Guiderdoni (IAP), F. Hammer (Obs. Paris),
G. Helou (Caltech), C. Martin (Caltech), J.-L. Puget (IAS),
G. Rieke (Arizona), D. Schiminovich (Caltech), L. Vigroux (CEA/IAP)*

Sponsors: CEA, CNES, Programmes Nationaux Galaxies/Cosmologie
